EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

-Claims 26-28 are cancelled by the examiner as being a non-elected group as set forth by the Restriction requirement filed September 3, 2003.

2. The following is an examiner's statement of reasons for allowance: The prior art does not teach a test head assembly as defined by the claims. Specifically, the prior art does not teach the combination of an elongated blade extending into an internal region of the test head, a bearing assembly having first and second races disposed in the internal region of the test head, the first race being connected to the blade and the second race being connected to the test head, the races being free to rotate with respect to each other in compliance with the applied forces. The prior art to Nakajima et al. (US Patent 5,642,056) shows an elongated blade extending into a test head, wherein an interference coupling is positioned in an internal region of the test head to rotate with respect to each other in compliance with the applied forces. The prior art to Nakajima et al. does not teach the interference coupling having a first race and a second race as defined by amended claim 1, but teaches the coupling as a ball disposed in a recess.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
